PROFESSIONAL SUMMARY

Senior Java Full Stack Developer with 9+ years of experience building scalable, cloud-native microservices and distributed systems. Expert in Java, Spring Boot, Kafka, Kubernetes, and React/Angular, delivering high-performance applications. Proven impact: handled 1M+ daily transactions, improved API performance by 35%, and reduced deployment time by 40%. Strong in system design, event-driven architecture, and secure application development (OAuth2, JWT).

KEY PROJECTS

- Microservices E-commerce Platform – Spring Boot, Kafka, Docker, Kubernetes
- API Gateway + JWT Security System – Spring Cloud Gateway
- Event-driven Order Processing System – Kafka + Redis

GitHub: github.com/Paraselli

TECHNICAL SKILLS

Core Expertise

Java, Spring Boot, Microservices, Kafka, AWS, Azure, React, Angular

Programming Languages

Java (8–21), Python, PL/SQL, JavaScript (ES6+), TypeScript, C, C++

Backend & Frameworks

Spring (Core, MVC, Boot, Security, Data, Batch, WebFlux, AOP, Actuator),
Spring Cloud (Config Server, Service Discovery, API Gateway, OpenFeign),
Resilience4j (Circuit Breaker), Spring Retry
Hibernate/JPA, Hibernate OGM, TypeORM,
Node.js (NestJS, Express),
RESTful & SOAP Web Services (JAX-RS, JAX-WS), Apache CXF

Frontend Technologies

React.js (16–19) with Hooks, Redux, React Router, memoization, code-splitting, lazy loading; Angular (AngularJS, Angular 14–17) with standalone components, Signals; HTML5, CSS3, Bootstrap, jQuery

Messaging & Integration

Apache Kafka (producers, consumers, topics, partitions), ActiveMQ, RabbitMQ, IBM MQ, JMS, MQ Series

Databases

MySQL, PostgreSQL, Oracle 11g, MongoDB, Redis

Cloud Platforms

AWS (EC2, S3, RDS, Lambda, SNS, SQS, API Gateway, CloudWatch, IAM, VPC, EKS),
Microsoft Azure (AKS, Azure Blob Storage, Azure Monitor, Application Insights, Azure DevOps, Key Vault)

DevOps & CI/CD

Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, CI/CD Pipelines, Infrastructure as Code basics (IAM, VPC, Security Groups)

Build, Testing & Tools

Maven, Gradle, ANT, JUnit, Mockito, TDD, Postman, Swagger, SOAP-UI, Log4J

Version Control & Others

Git (GitHub, Bitbucket), SVN, WebSphere Application Server (WAS), JBoss, Linux, Shell Scripting

Monitoring & Observability:

Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor

Design Patterns & Architecture

Singleton, DAO, Factory, MVC, MVVM, Session Facade, Front Controller, Microservices, API Gateway, Event-Driven Architecture, Clean Architecture

AI Tools

GitHub Copilot for code generation, refactoring, unit test creation, and developer productivity

PROFESSIONAL EXPERIENCE

Wissen Infotech Pvt. Ltd. — Hyderabad

Client: Wabtec Corporation (Transportation / Industrial Domain)

Sr. Java Full Stack Developer

Apr 2024 – Mar 2026

- Led design discussions and guided a team of 4 developers in implementing scalable microservices and best practices.
- Contributed to system design decisions for distributed microservices, enhancing scalability, performance, and maintainability.
- Architected and developed high-throughput cloud-native microservices using **Java 21, Spring Boot, Spring Cloud Gateway, Spring Security, and Spring Batch**, handling 1M+ daily transactions with **35% improvement in API response time** via Java Streams, caching, and query optimization.
- Designed and implemented **JWT + OAuth2** authentication, API Gateway patterns, and role-based access control for secure internal/external access.

- Built modern responsive SPAs using **React 19** with Hooks (useState, useEffect, useMemo, useCallback), React.memo, code-splitting, lazy loading (Suspense), and memoization techniques, significantly enhancing UI performance.
- Built responsive UIs using **React 19** and contributed to **Angular 17** components using standalone architecture, Signals, and modern control flow to improve performance and maintainability.
- Developed backend services using **Node.js (NestJS + Express)** with TypeORM, dependency injection, validation, and seamless integration with MySQL.
- Designed event-driven microservices with **Apache Kafka** (optimized producers, consumers, topics, and partitions) for real-time streaming and asynchronous processing.
- Containerized applications with **Docker**, deployed on **Azure Kubernetes Service (AKS)**, and automated CI/CD pipelines using **Jenkins + Azure DevOps**, reducing deployment time by **40%**.
- Implemented centralized monitoring with **AWS CloudWatch, Azure Monitor, Application Insights, Prometheus, and Grafana**; used **Redis** caching and **Azure Blob Storage** for large file handling.

Webject Systems Inc. — Chicago, USA

Client: Medline Industries (Healthcare Domain)

Sr. Java Full Stack Developer

Dec 2022 – Dec 2023

- Designed and developed enterprise-grade microservices using **Java 8/17, Spring Boot, Spring MVC, Hibernate/JPA, and Spring Security** with OAuth2 + JWT for secure healthcare transactions.
- Built and optimized RESTful APIs and **Spring Batch** jobs for large-scale data processing and automated notifications.
- Developed responsive SPAs using **Angular 16 with exposure to Angular 17 features**, leveraging standalone components and modern control flow for improved maintainability.
- Built additional REST APIs using **Node.js + Express.js** with **MongoDB** integration.
- Migrated legacy databases from Oracle/MSSQL to **PostgreSQL** on Azure; containerized applications with **Docker** and deployed on **AKS**.
- Implemented event-driven workflows using **Apache Kafka** for high-volume asynchronous processing with replication and consumer offset management.
- Automated CI/CD pipelines with **Jenkins**, improving deployment reliability and speed.

Honeywell Technologies — Bengaluru, India

Domain: Physical Security & Video Surveillance

Full Stack Java Developer

Dec 2021 – Jun 2022

- Designed and developed full-stack microservices using **Spring Boot, Spring MVC, and AngularJS/Angular 14**, building RESTful APIs for internal and third-party integrations.
- Developed reusable UI components with **Angular 14, Redux, HTML5, CSS3, Bootstrap, and JavaScript**; implemented state management and SPA routing.
- Implemented authentication and authorization using **Spring Security**.
- Deployed applications on **Azure** cloud infrastructure with **Docker** and CI/CD pipelines using **Jenkins**.

- Performed unit and integration testing to ensure application stability in Agile Scrum environment.

Softpoint Technologies

Client: Cybage Software Pvt. Ltd. (Enterprise Application & Digital Solutions) – India

Full Stack Java Developer

May 2017 – Nov 2021

- Designed and developed enterprise web applications using **Java, Spring Boot, Spring MVC, Hibernate/JPA**, following layered MVC architecture and design patterns (DAO, Factory, Singleton).
- Built RESTful APIs with **Spring REST and Jersey**; developed responsive SPAs using **React.js (16–19)** with functional components, Hooks, React Router, JSX, props, state, and TypeScript.
- Implemented **Spring Security** for authentication, authorization, and role-based access control.
- Integrated **Apache Kafka** and **IBM MQ** for asynchronous messaging; worked with **Oracle** and **MongoDB** databases.
- Automated builds and deployments using **Jenkins, Maven, Gradle**, and deployed on **AWS**; performed unit testing with **JUnit + Mockito** in Agile Scrum setup.

Glowmask Technologies

Client: Sonata Software – India (Banking & Financial Services Domain)

Java Developer

Jun 2015 – Apr 2017

- Developed and maintained Java-based enterprise applications using **Spring MVC, Hibernate, J2EE**, RESTful & SOAP web services (**Apache CXF**).
- Built dynamic UIs with **AngularJS, HTML5, CSS3, Bootstrap, and JavaScript**; integrated **Spring** with **MongoDB** using Hibernate OGM.
- Designed and optimized **PL/SQL** stored procedures, triggers, and queries; implemented messaging with **JMS and MQ Series**.
- Automated builds/deployments using **Maven and ANT**; monitored applications with **Log4J** on Linux environments.

EDUCATION

Master of Technology (M.Tech – Computer Science & Engineering)

JNTU Kakinada, India – Dec 2015

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
Credential ID: **SH9L4PSJSF1EQVC2**
- Microsoft Azure Administrator (AZ-104)
Credential ID: **MS0993645928**
